### Overview:

**Alternative Therapies in Pain Management: Evidence-Based Approaches** is an interactive, virtual conference that will deliver information on current and emerging evidence-based approaches of traditional and alternative therapies in the management of pain induced by migraine, osteoarthritis, and surgery. This conference is a great opportunity for you to earn 7.0 CME credits while networking with top minds in pain management. A panel of experts will present the latest data and use patient case scenarios to illustrate the diagnosis and treatment of patients experiencing pain. You will be able to submit questions and participate in expert discussions, all via our custom, virtual, interactive platform. You will benefit from our seamless user experience, leveraging our innovative platforms for interactive learning.

### Hot Topics for 2020

- Legal regulations of complementary and alternative medicines
- Incorporating alternative treatments into migraine management
- Well-coordinated care between providers and institutions
- The most effective nonpharmacologic therapies for osteoarthritis
- The evolving role of stem cell therapy for pain management
- Approaching recommendations of cannabis to treat patients for pain
- Barriers to prescribing abuse deterrents
- Genetic testing for opioid pain management
- Best strategies for measuring intra-operative pain during general anesthesia

### Benefits of Attending

- Review the importance of alternative therapies for the management of pain
- Examine the efficacy and safety of alternative pain agents/modalities for the treatment of migraine pain
- Network, virtually, with your peers and expert faculty

## VIRTUAL, INTERACTIVE CONFERENCE

### Saturday, November 14
